

ABSTRACT

5 The present invention is directed to a header  
assembly attachable to a medical device for the purpose  
of connecting its output terminals to at least one lead,  
the lead terminating at a target organ or portion of the  
body intending to be assisted. A number of leads are  
connectable to the header, including single and coaxial  
leads. The header assembly may be molded directly to  
10 the medical device or preformed and then attached to the  
device casing, either by mechanical fastener and/or  
chemical adhesive.
